

TYSOE COMMUNITY EMERGENCY ACTION PLAN

**Information for
residents**

Aims and Objectives

The aim of the plan is to enable Tysoe Parish Council to provide effective support to the local community and emergency response agencies during a major incident.

This will be achieved by:

- Collating relevant local information and providing information to responders, when requested, throughout the emergency.
- Establishing local co-ordination arrangements for assisting with the impact of the emergency at the local level.
- Providing appropriate contact details for the Parish Council, key community resources, the emergency services and local authorities.
- Identifying local people and local organisations that may be able to assist during an emergency.
- Supporting the local authority by identifying vulnerable people in the community.
- Supporting the local authority by identifying and activating places of safety for the public prior to handing over to the local authority.
- Assisting responding agencies by identifying resources in the community that may be available to utilise during an emergency.

Activation Process

This plan will be activated when the community needs immediate help or support in response to an emergency. It should also be activated in relation to notification of an incident e.g. from the emergency services or the local authority. Examples of when the plan should be activated include:

- First-hand observations of an incident (e.g. flood waters rising).
- Reports of an incident within the area by a member of the community.
- Notification from the Emergency Services, CSW Resilience, District and Borough Councils or Warwickshire County Council.

If there is immediate risk to life, call 999.

In the event that you cannot obtain support from the main emergency services and you wish to contact the Parish Council, you should phone:

Amanda Venables (Chair) 07427 263261 or Vanessa Plain (Clerk) 07508 785999

Local Risk Assessment

Tysoe Parish Council has undertaken an assessment to identify potential risks to the village, their location and likely impact on the community. The PC has identified suitable responses and will provide some resources to help mitigate the impact of any such events.

Residents are encouraged to look at their own homes and to take such steps as they can to prepare for possible risks e.g. flooding. Good advice is available from Warwickshire County Council in their document 'Home Emergency Plan', available here: [Home Emergency Plan | CSW Resilience Team](#)

District and County Councillor Details

Local District Councillor:	Malcolm Littlewood 07494 572977 07514 951174
Local County Councillor:	Chris Mills 07966 133607

Health and Medical Providers

Organisation	Details
Local Doctors:	Kineton and Tysoe Surgeries 01295 680220 Shenington Surgery 01295 678124

Call 999 for emergency medical treatment.

If someone needs advice or medical treatment quickly, and it cannot wait for an appointment to see the doctor, call 111.

Resources

Should an emergency event arise, the PC will attempt to supply appropriate resources e.g. sandbags/flood sacs from a central store. There is a first aid kit and resource bag which is held at the Peacock Inn.
